

Discussion of WP3 (Knowledge base) and interfaces with WP2 to 6

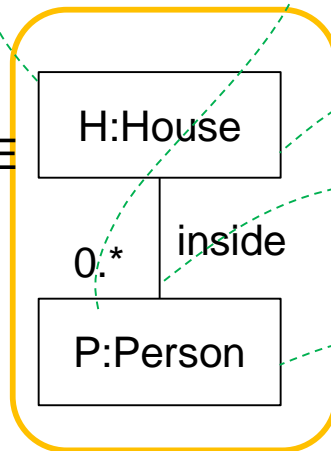

Existing solution in
SIRIUS

L1=HOUSE

L1=HOUSE

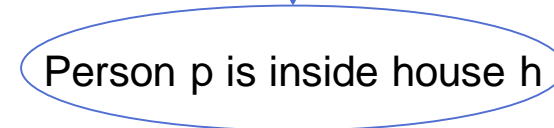

Model for
classes

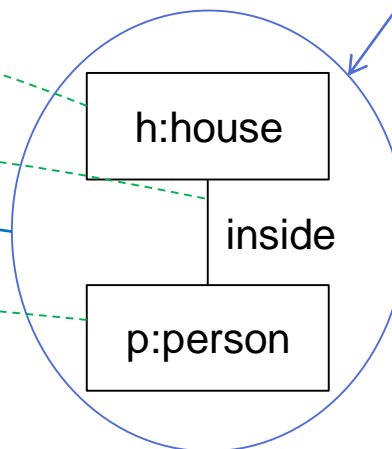

“This person is inside her house”

Manual
standardizati
on activity?

Is Loria solution
OK?

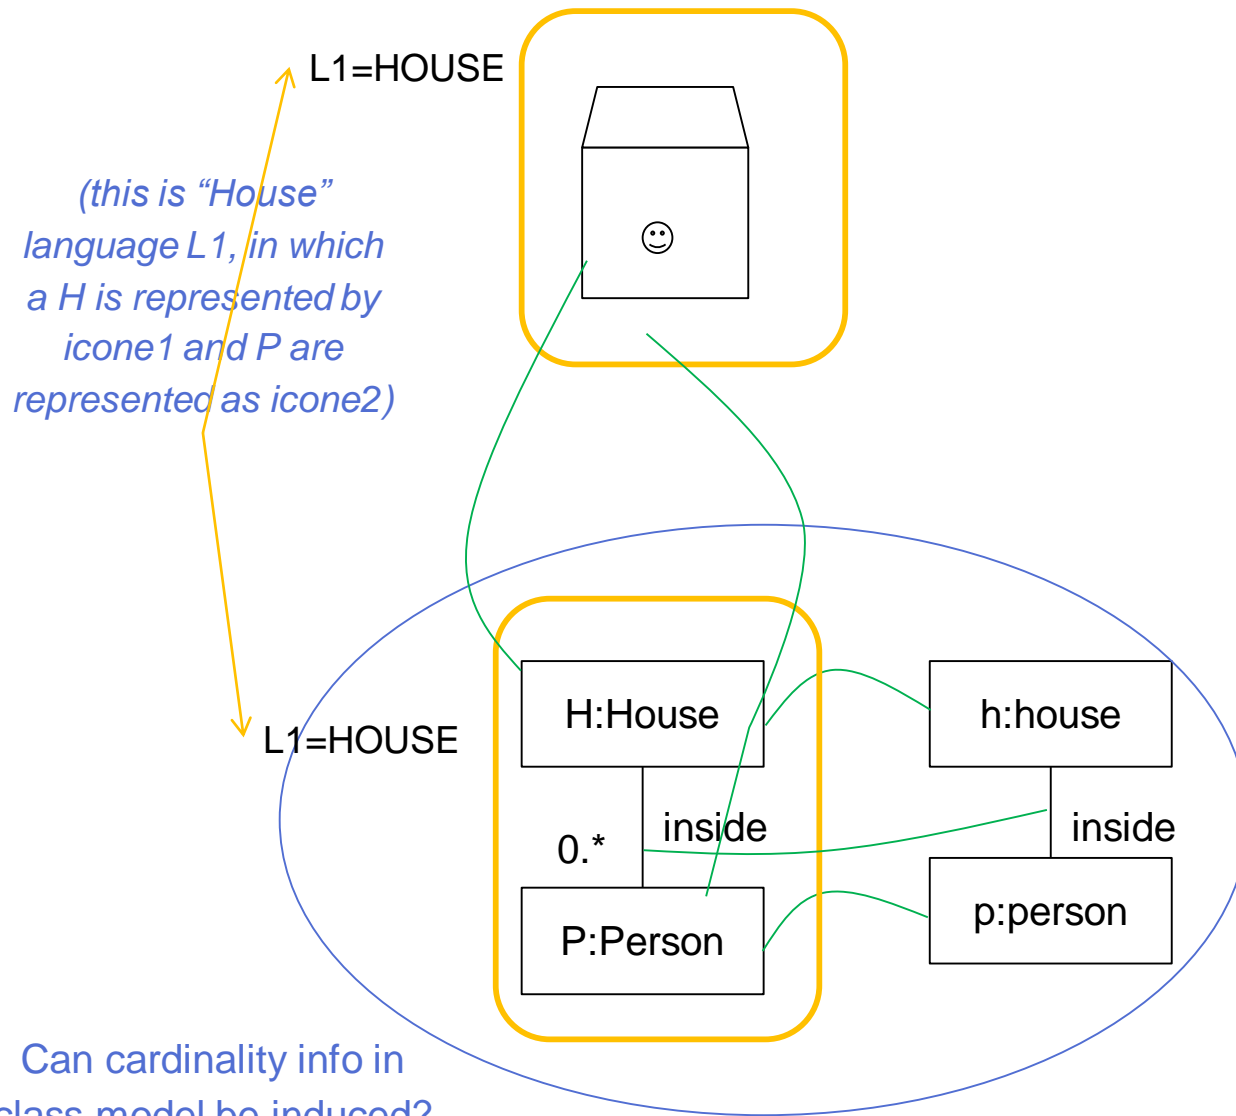

Model for
instances

To be KB
mechanism?

Rendering rules apply
for “House” language L1.
In L1 a H is represented
by icone-h and a P is
represented as icone-p)

Can eCORE be
the modeling
solution?

"This person is inside her house"
